

GUSTAVO BUONGIORNO BERTON

Senior AI Solutions Architect | Legacy Modernization & Cloud Transformation Lead

Buenos Aires, Argentina (GMT-3) | +5491140628654 | gberton1967@gmail.com LinkedIn: [linkedin.com/in/gustavo-berton/](https://www.linkedin.com/in/gustavo-berton/) | Portfolio: <https://icy-mushroom-0f151811e3.azurestaticapps.net/>

PROFESSIONAL SUMMARY AI Solutions Architect with over 26 years of experience specializing in the strategic bridge between critical legacy infrastructure and cutting-edge architectures. Expert in designing **Cloud Native (Azure)** solutions that maximize **ROI** through **Agentic AI**, having led the deployment of microservices that automated over 46,000 interactions in just 5 days, eliminating months-long backlogs and saving 3,800 operational hours. Specialist in transforming technical debt into digital assets using **Enterprise Integration Patterns (EIP)** and **FinOps optimization**, with a proven ability to migrate complex systems (COBOL/Access) to modern, scalable, nationwide environments. Bilingual leader with international training focused on responsible innovation, **Intelligent Document Processing (IDP)**, and high-impact operational efficiency.

TECHNICAL SKILLS (CORE COMPETENCIES)

- **Cloud Architecture:** Microsoft Azure (Data Services, Cognitive Services), Microservices, Serverless Functions, API Gateway.
- **AI & Automation:** Intelligent Document Processing (IDP), AI Agents, OCR (Computer Vision), NLP/Chatbots, Python (FastAPI).
- **Full Stack Development:** Python (Django/Flask), PostgreSQL, ReactJS, Vite, Tailwind CSS, RESTful APIs.
- **Legacy Modernization:** Database Migration (Access/Cobol to SQL), ERP Integration, Systems Re-platform.
- **Infrastructure:** Linux/Windows SysAdmin, LAN/WAN Networks, 24/7 Critical Support, IoT Security.
- **Methodologies:** Agile, Scrum, Functional Analysis, SDLC, Requirements Engineering.
- **AI Stack: LLMs: (GPT-4, Claude, Llama), Orchestration: (LangChain, LangGraph), Databases Vector: (Azure AI Search, Pinecone), RAG, AI Governance.**

Soft Skills: Critical Thinking, AI Literacy, Learnability and Adaptability to Change, Intelligence Emotional, Communication, Creativity

PROFESSIONAL EXPERIENCE

NATIONAL ROAD SAFETY AGENCY (ANSV) | Buenos Aires, Argentina Senior AI Solutions Architect & Functional Lead
| 2016 – Present Leading the digital transformation of the national road safety infrastructure, transitioning from legacy on-premise systems to cloud-native AI architectures.

- **Process Automation with AI (Agentic AI):** Architected and deployed an "AI Email Agent" microservice (Azure/FastAPI) that automated the response to **46,000+ overdue emails in just 5 days**, reducing the expected manual labor by approximately 3,800 hours and eliminating a 6-month backlog.
- **Intelligent Document Processing (IDP):** Developed a computer vision-based "Image Management Service" to validate **28,000+ driver's license documents**, enforcing security compliance and reducing human verification time by ~60%.
- **Legacy Modernization (Access to Cloud):** Led the strategic migration of mission-critical management systems from **Microsoft Access to Python/Django & PostgreSQL**, resolving data concurrency issues and enabling scalability for national deployment.
- **Operational Optimization:** Designed automated "Smart Forms" (Google Forms integration) for the annual registration of 2,500 officials, reducing administrative processing time by **50%**.
- **EdTech Implementation:** Deployed a Virtual Training Management System that reduced errors in Registration and certification at **80%**, ensuring regulatory compliance for thousands of municipal officers.

LicenGO | Solutions Architect & Product Lead (SaaS)

Design and development of a hybrid intelligent platform (Bot/Ticketing) for the self-management of driver's licenses under a Software as a Service (SaaS) model.

- **RAG (Retrieval-Augmented Generation) Architecture:** I implemented an AI engine "educated" exclusively with legal regulations and driving regimes, using **RAG** techniques to ensure accurate answers, with verifiable sources and no hallucinations.
- **Enterprise Integration Patterns (EIP):** I designed the data flow using enterprise integration patterns to seamlessly connect the self-service chatbot with the core ticketing system, ensuring scalability and service decoupling.
- **FinOps Optimization:** I led the **FinOps** strategy in Azure, optimizing token and computing resource consumption, achieving an efficient cost structure for a high-volume SaaS business model.
- **Impact:** I transformed a complex administrative process into a 24/7 self-management solution, reducing the human operational burden and standardizing the interpretation of regulations.

PAN AMERICAN HEALTH ORGANIZATION (PAHO/WHO) | Consultant Digitalization Consultant Processes | 2021

- **Workflow Optimization:** Led the digitization of internal administrative processes, achieving a **40% reduction in processing time** for critical health data reports.
- **Automation:** Developed automated scripts for report generation, eliminating manual input manual repetitive data entry and improving data accuracy.

Previous Technical Experience | 1994 – 2007

- **Leadership in Critical ERP Migrations:** I spearheaded the transition from mainframe core systems (RM Cobol) to relational architectures (SQL). I also led System Design, modernizing critical back-office functions and extending the operational life of enterprise platforms by more than a decade.
- **Infrastructure and Tier-3 Support Management (Remote Site Management):** I managed highly complex IT operations and technical support (24/7) for critical infrastructure in the financial (**Citibank**) and energy (**Tecpetrol**) sectors. As the **remote site manager**, I ensured operational continuity through hybrid support (telephone and on-site), achieving up to 70% improvements in system availability under banking and mission-critical standards.
- **Management of Massive Digitization and IoT Projects:** I coordinated the conversion of large-scale national registries using OCR and led perimeter security projects based on IoT/M2M technologies for massive residential infrastructures
- **Elite Training and Internationalization:** Continuous training at the forefront of technology, including **Specialized training in Operating Systems and Development in Atlanta, USA.**

INNOVATION PORTFOLIO (AI & CLOUD)

- **Live Conference (Translate AI):** Real-time simultaneous interpretation platform built on **Azure Cognitive Services**, breaking down language barriers at live events.
- **OpiFood (Computer Vision):** Inventory automation prototype using Computer Vision for stock counting and menu optimization logic.
- **Adgenie (B2B Automation Bot):** NLP-powered chatbot designed for advertising agencies to automate customer management and B2B responses.

EDUCATION AND CERTIFICATIONS

- **Systems Analyst** | Catholic University of Argentina (UCA)
- **Certifications:** Generative AI (LinkedIn 2024), Functional Analyst, Agile & Scrum, Django Development, ReactJS + Vite, IBM Z Skill Fest.
- **Languages:** Spanish (Native), English (B2+ Professional Proficiency - Accenture Certificate 2023).
